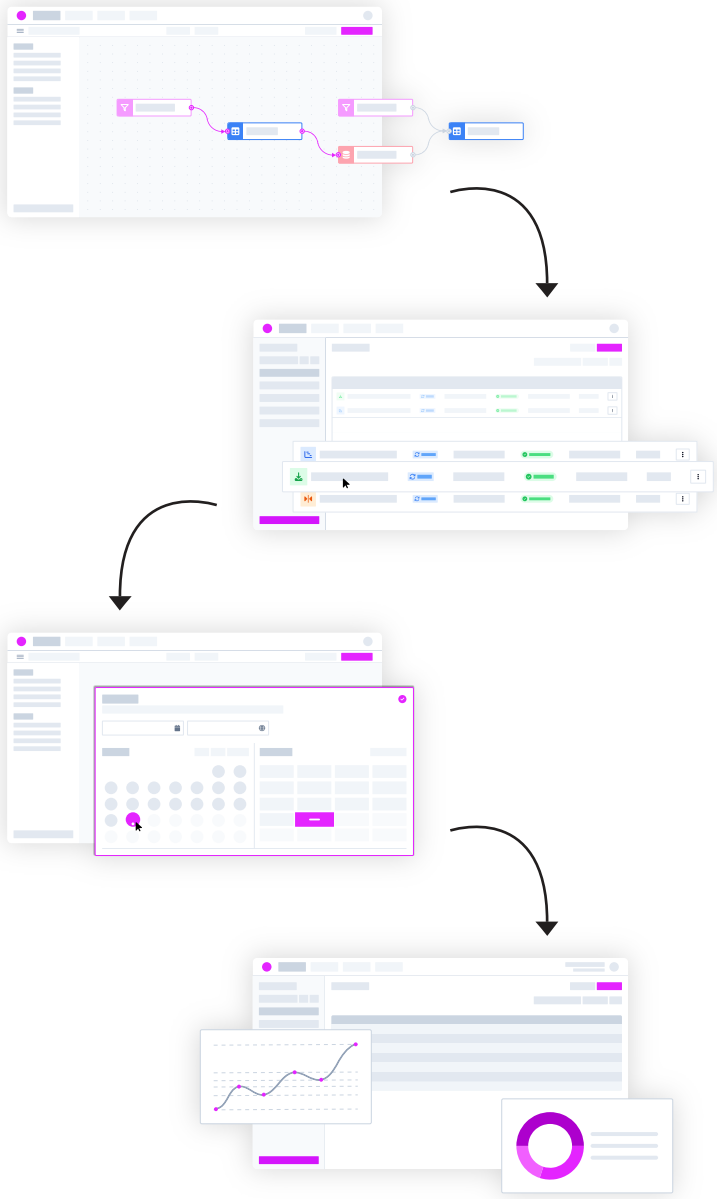
The Challenge: SAP data analytics without complexity

Data analysis is an essential component of every company's success. However, there are several challenges that make it difficult to gain insights from SAP data.

- SAP restrictions limit data access via APIs
- Complex SAP data structure makes data access difficult
- High performance data access means a high amount of work
- Combination of different tools worsens the workflow
- Individual requirements for the results are not fulfilled 100%

The Solution: dab Nexus



How it works

Flexibly define the analytic goals you wish to achieve on our end-to-end platform.

1 Data Extraction with Package Studio

Define your own extraction logic or use proven templates.

2 Analysis with Content Studio

Use ready-made analyses or create custom SQL queries.

3 Task Management

Create individual tasks that your ETL data pipeline runs in the background.

4 Turning Results into Action

Flexibly use your analytic results in dashboards, workflows or integrated in other applications.

The platform combines great usability with powerful functionalities. It creates the basis for more self-service and efficiency in data-driven organisations.

OPTIMIZED SCHEDULING AND DATA ACCESS

Define the data, timing, and frequency of replication with optimized delta logic for efficient extraction and reduced processing time.

SAP CDS VIEW SUPPORT

Supports classic SAP CDS Views and CDS Views Entities, keeping your analytics stable and future-proof with SAP's evolving S/4HANA data model.

BUILT-IN DATA PRIVACY

Pseudonymisation of personal and sensitive data with Privacy Protection.

SEAMLESS INTEGRATION

Connect effortlessly with tools like Microsoft Power BI for smooth end-to-end integration.

AUTOMATED MONITORING

Schedule recurring analytics or extractions to run automatically.

CUSTOM ANALYTICS

Manage your own analytics and edit them in a flexible and integrated script editor.

dab Nexus is the result of more than 20 years of experience in automated analytics for SAP data
