## Our Mission: Data Analytics

We turn SAP data into insights – for well-founded decisions, secure processes and measurable added value.

As a bridge between people, technology and data, we combine intuitive software, reliable algorithms and AI methods with professional consulting at eye level to create a holistic data analytics solution.

## Our Partners

For the best possible integration of SAP data analytics into Microsoft Fabric, Azure and the Power Platform.

For the data-driven extension of the leading ESG, GRC & board management solution.

Rödl & Partner

Our strategic partner for delivering analytics solutions to German medium-sized enterprises which are global market leaders.

## Our Vision

# Making analytics fundamental

### This is how we realize our vision:

- 1 SAP data extraction - fast, secure and certified**  
Seamless data access - without impacting system performance. Optimized for large data volumes and targeting Microsoft Fabric.
- 2 Analytical content & Data Products - 300+ ready-to-run use cases**  
Pre-built SAP Data Products, ready for immediate use. Flexible use for BI, reporting, audit, process mining or finance.
- 3 AI software & services - turning data into intelligence**  
Our renowned data science team has been developing smart solutions since 2019. Benefit from anomaly detection, forecasting and process automation.
- 4 Diligent One Platform - Governance in a nutshell**  
We offer you the leading GRC platform in partnership with Diligent. For secure processes, effective controls and regulatory security.

# One integrated platform for SAP data analytics

Our software solves your key challenges: Certified SAP data access, comprehensibly prepared Data Products, ready-2-run analyses - and a proven entry into AI.

It also integrates seamlessly with Microsoft Fabric, Azure, Power BI and the Power Platform.

**SAP Certified**  
for clean core with SAP S/4HANA Cloud

**The best platform for SAP data analysis - flexible, expandable, on-premises**

From certified SAP data extraction to the integration of analytic content - dab Nexus covers it all.

dab Nexus

**SaaS solutions for specific use cases - e.g. duplicate payments or process mining**

AI-supported modules with immediate benefits. Ready to go in minutes, fully integrated into your Microsoft environment.

dab Loom

**Predefined SAP analyses & Data Products - ready for immediate use**

Over 300 analyses for all business areas - based on comprehensibly prepared SAP data.

dab AnalyticSuite

**Display alerts & results directly in SAP**

For maximum transparency and highly efficient workflows.

dab Link

# dab: data driven services - your experts for SAP data analytics

Our specialized subsidiary for consulting and data analytics services - always practical, with a partnership on eye level and a clear focus on results.

We not only provide the software, but also the necessary expertise - from consulting, training and AI model development to management consulting.

**You have the data - we provide the insights**

We perform our pre-defined analysis for you and provide the results in comprehensible reports.

Data Analytics as a Service

**Training - Understanding and applying data analytics**

We offer customized training for all areas - whether for SAP data analytics, working with analysis tools, or using Diligent solutions.

Trainings & Courses

**Support+ AI - Analytics & Data Science on demand**

Our team develops customized analyses outside of the standard portfolio or provides support for AI-driven use cases.

AI Analytics on demand

**Strategic consulting - for structured enablement**

We advise on building your data analysis team, including the transfer of in-house expertise, resource selection, software strategy and project planning.

Consulting & Enablement
