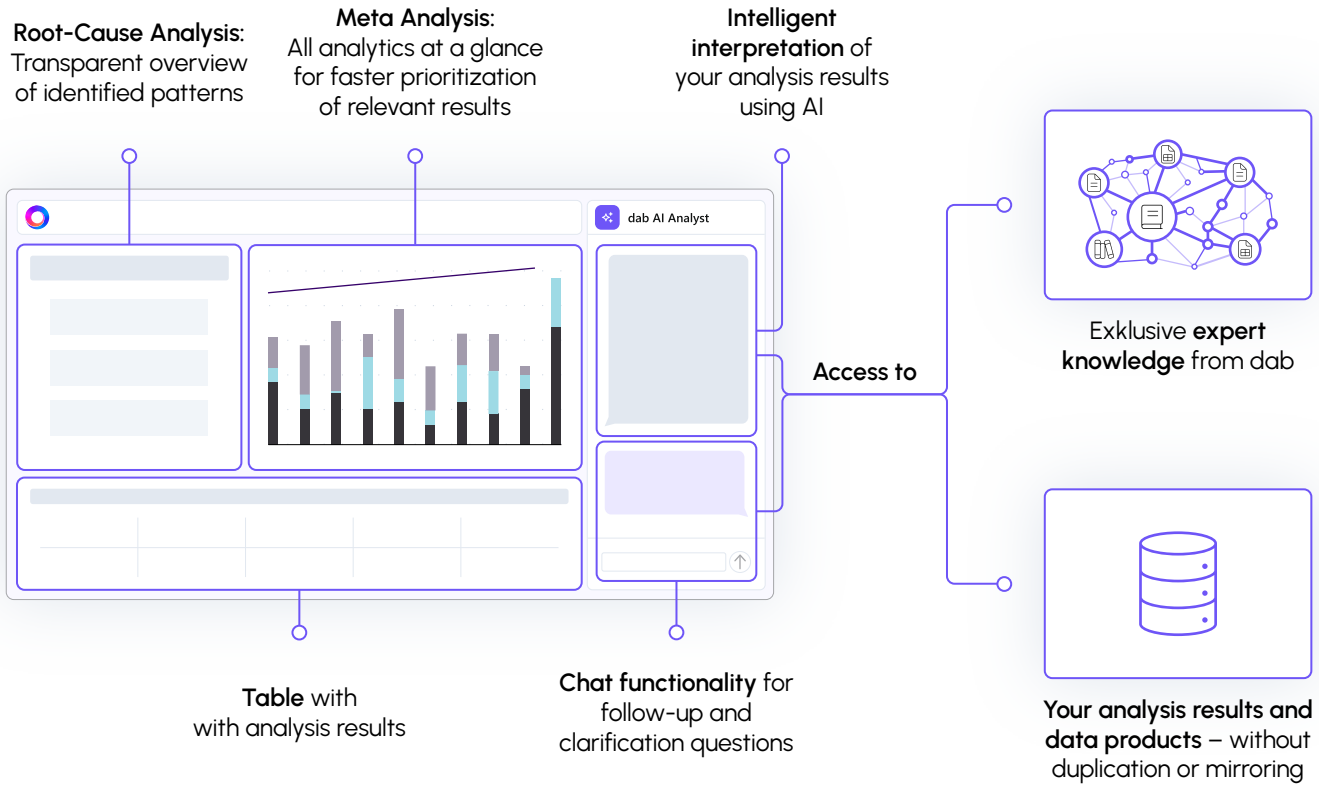
dab AI Analyst

Root-cause analysis, relevant background knowledge, chatbot interaction and cross-analysis of results – all combined in a single, shared analysis interface.



From Analysis Guesswork to Precise Insights

dab AI Analyst brings clarity to the follow-up of your analysis results: **Automatic detection of patterns and root causes, interactive visualizations** for faster prioritization of relevant results, and **clear explanations powered by generative AI.** The integrated chat answers questions **directly based on your data and exclusive SAP expert knowledge.**

Key Features

Central View of all Analytics

A holistic overview of all analytics, automatic pattern and root-cause detection, plus easy-to-understand explanations through Explainable AI enable a comprehensive understanding of the results.

Exclusive Expert Knowledge instead of Generic Content

dab AI Analyst uses exclusive and curated know-how and knowledge about data structures, business processes, and analytical methods.

Single Touchpoint

Interaction and follow-up take place entirely in Power BI – no tool switching, no additional user interface.

Generative AI remains useless in SAP data analytics as long as it lacks data access and the necessary domain expertise.
dab AI Analyst closes this gap.

MORE CONFIDENCE IN DECISION-MAKING

Clear correlations enable fact-based actions.

FASTER INSIGHTS

With dab AI Analyst, go from data collection to insights in the shortest possible time.

IN-DEPTH ROOT CAUSE ANALYSIS

Instead of relying on samples, dab AI Analyst identifies the root causes behind analysis results.

DOMAIN KNOWLEDGE INCLUDED

The AI has access to specialized, non-public know-how about SAP processes and analytics.

VISUALIZATIONS THAT GET TO THE POINT

Interactive Power BI dashboards visualize relationships instead of just numbers.

REDUCED ANALYSIS EFFORT

Complex analytics are evaluated and prepared automatically, drastically reducing manual effort.

USER-FRIENDLY AND FAMILIAR

Work in the familiar Power BI environment – no training required.

MAXIMUM RELEVANCE FOR SAP USERS

Full focus on business processes in SAP – not a generic tool.

Experience the next evolution step in SAP data analytics with dab AI Analyst
