

**dab** Loom

# The ultimate SAP data analytics solution using Microsoft Fabric

High-performance, zero-impact,  
future-proof

Microsoft  
Solutions Partner

Manufacturing AI  
Certified software  
dab Loom - SAP Data Analytics  
Platform as a Service

**SAP Certified**  
for clean core with SAP S/4HANA Cloud

## The Challenge: SAP data analytics without complexity

Companies need powerful data analysis tools that deliver insights quickly without being overly complex. Yet in practice, this very requirement presents a number of challenges:

### Usability:

Need for tools that are accessible to non-technical users

### Speed to Value:

Demand for fast, actionable results

### Integration:

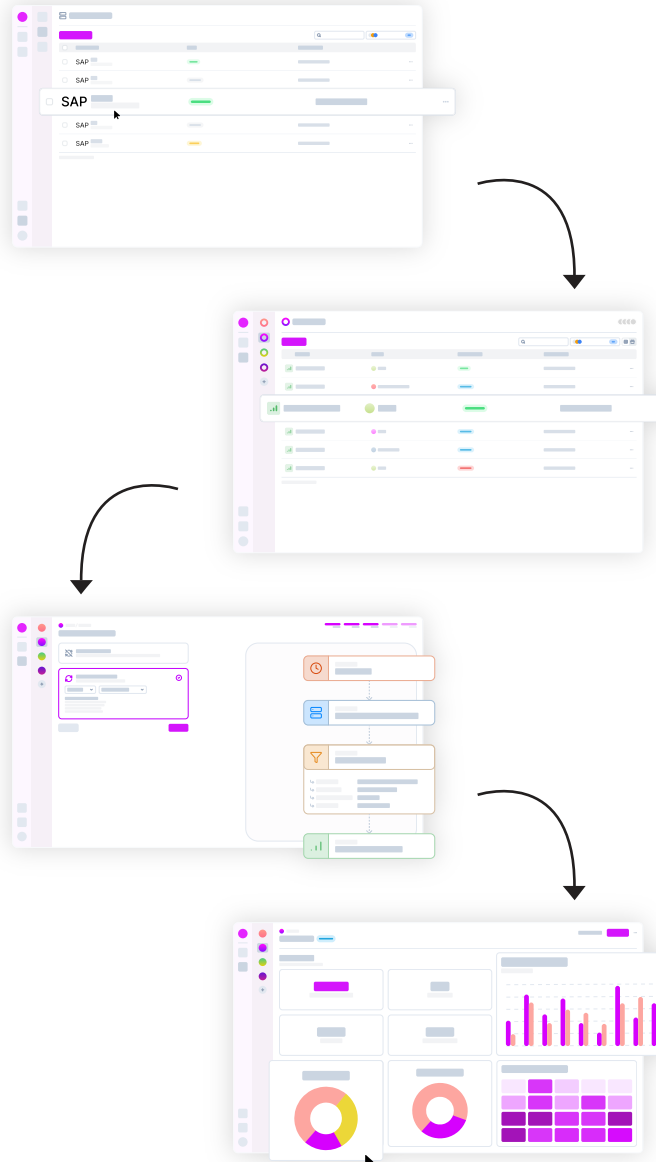

Desire for seamless integration with Microsoft Azure

### Data Security:

High priority on secure data processing workflows

## The Solution: dab Loom

## How it works

Simply enter your SAP credentials, select the desired report, and receive instant results in Power BI or Power Automate.

1

Seamless SAP data extraction via a Clean Core Level B-certified function module

2

Data is securely stored in a lakehouse within the Microsoft Azure EU West region

3

Transformation of SAP data into reports or event logs

4

Use prebuilt Power BI reports for various business areas

Experience the ease of cloud-based SAP data analytics with dab Loom, designed for everyone.

#### **CLOUD CONVENIENCE**

Hosted on Microsoft Azure, so it fits easily into your existing environment.

#### **DATA SECURITY**

Ensures secure handling of your SAP data with robust privacy protections.

#### **TIME TO VALUE**

Achieve rapid, actionable insights without the usual complexity and delay.

#### **DATA ANALYTICS EXPERTISE**

Built on over 20 years' experience of working with SAP data, providing reliable and accurate insights.

#### **SIMPLICITY AND SPEED**

User-friendly interface offering fast results, built on Microsoft Fabric for optimal performance.

#### **FIRST MOVER ADVANTAGE**

One of the first solutions in the Microsoft Fabric environment to take full advantage of its capabilities.

**Over 20 years of expertise  
in automated SAP data  
analytics – now delivered  
with Microsoft Fabric**
